

An Open Letter Reviewing Scriptural and Scientific Evidence For Creationism

ABSTRACT: (click on section headings to see full text)

2/6/07

1.0 Holy Scripture is the inspired Word of God.

Many infallible proofs show the Bible to be the authentic Word of God. and it's inspired by the Creator (2Ti 3:16). The Genesis text has proven to be a historical narrative, to be taken literally.

2.0 Creationism is foundational to many doctrines of Christianity.

The Creator and creationism are fundamental to Christianity, containing the foundations of many doctrines in the Bible, including the origin of sin and death and the promise of the Redeemer.

3.0 The Bible addresses all truth: science, history, & spiritual.

As the written Word of God, the Bible is historically and scientifically true, and authoritative on all subjects. As a book of history, the Genesis account is a factual presentation of actual events.

4.0 True science and scripture are completely compatible.

Scientific evidence has never contradicted scripture. Evolution is not science, but a set of presuppositions that impose an evolutionary framework on the interpretation of scientific data. Christians need to use the Bible as an interpretive framework (worldview) to evaluate scientific data.

5.0 Scripture Rejects Darwinism.

Scripture teaches a recent origin for man and the whole creation. God created all living things during the Creation Week. The days of Creation in Genesis are properly translated as six consecutive twenty-four hour days. The Flood of Noah was a catastrophic, global geological event.

Evolution is defined to be pure chance. Only naturalistic processes are allowed. There is no room for God in evolution; it is the cornerstone of atheistic humanism.

6.0 Science has falsified Evolution Theory.

The fossil record fails to support Darwinian gradualism. The explosion of life recorded in the Cambrian strata shows CREATION, not evolution. The failure of homology has disproved Darwinism. Hundreds of credentialed scientists are now on record expressing serious doubts about the theory..

7.0 Jesus was a Biblical Creationist

The Bible tell us that Jesus is Creator. He is the Eyewitness to the Creation, and He taught from Genesis. In Mark 10:6, Jesus says Adam was created in the beginning, clearly refuting theistic evolutionism. Believers accept the claims of Christ..

8.0 Scripture allows no Death Before Sin

The Bible tells us that the death (spiritual & physical) entered into the world by Adam's one sin (Rom 5:12), not survival of the fittest. Struggle and death was a result of Adam's sin and couldn't have existed millions of years before Adam's sin. Thus evolution cannot be true.

9.0 Conclusion: The evidence Cries out Creation!
